

Sarah Penbrook

Sarah uses Leafable at work to organize employees. When its time for employees to be paid Sarah uses the search function to order employees in order baised on the criteria she has chosen. Sarah also has permission to use the new user button. When this button is used a new user can be added into the database. This button is only used when she hires an employee.

Jonathan Bayers

Jonathan uses Leafable as a moderator on a popular online game. Since he is a moderator he does not have access to the database directly. Jonathan main purpose is to ban users that misbehave according to the game rules. He has access to the delete button. Once Jonathan press the delete button a prompt will display asking if he is sure about deleting the user. If yes is selected the user data is erased.

Michael Roberts

Michael uses Leafable to manage all users within his tech startup. He is considered a super Admin because he has access to every feature within Leafable. Micheal had CRUD capabilities with his employees and customers using Leafable.
